Reporting a fault

In the event that a fault develops with your Venus Caravan, contact should always be with the retailer from which you purchased your caravan from. Your retailer is with whom your contract of sale is with and ultimately who will be responsible for carrying out a thorough pre-delivery inspection and arranging warranty work which may be required together with annual servicing.

Servicing

It is important that to maintain the validity of the Venus warranty, your caravan has an annual service and damp check carried out by an Approved workshop using genuine parts, recommended sealants and following Lunar procedures; failure to do so will invalidate your Venus warranty.

The Venus warranty is conditional on annual servicing being carried out 60 days either side of the anniversary purchase date for interim years. The third annual service must be carried out before the expiry of the 36 months warranty period from the original date of purchase. Failure to have your servicing undertaken within these guidelines does invalidate your Lunar warranty.

Your service handbook must be stamped accordingly and the original VAT invoices and damp report must be retained as proof that the annual service have been carried out in the accordance with the warranty terms and conditions.

Spare parts

Should you require any spare parts for your Lunar Caravan, please contact your dealer or nearest service centre; they in turn will contact our factory. To assist your dealer please provide as much information as possible including the VIN number of your caravan, model, full description of the part you require and if possible a photograph of the part.

Mains Electric

It is strongly recommended that your caravan mains electric system is inspected by a NICEIC approved engineer every 3 years.

Change of Ownership – Transfer of Warranty

The Venus warranty may be transferred to a new owner if the caravan is sold on. This is providing the caravan has been regularly serviced by a Lunar, NCC Approved Workshop or a workshop who is part of the Approved Workshop Scheme.

* **MTPLM** – Most models can have the MTPLM increased with minimal disruption. Contact your nearest Lunar Caravans dealer for further information.

The tyre pressures listed are the recommended tyre pressure for running at the stated weights and are calculated taking into account the weight of the caravan and assembly. Should the MTPLM weight change, the tyre pressure may also need to be adjusted depending on the model. Contact should be made with your dealer to check if the tyre pressure should be adjusted.

MRO includes a manufacturing tolerance to reflect changes in the weights of the raw materials. It is anticipated that this figure will never be exceeded in the caravans standard ex-works specification.

** Lunar Caravans would always recommend seeking the advice of your dealer or the awning manufacturer directly before purchasing an awning.
