

## Recommended operating pressures for Lunar Caravans 2019 range including weight plate upgrades

The pressures stated below are the STARCO recommended pressures for running at the stated weights for the given tyre. These may need to be adjusted for ride comfort but should not be adjusted without prior written authorisation from STARCO.

These pressures are calculated taking into account the weights shown and the assembly application. Should any of the MTPLM weights shown below change, STARCO must be consulted to ensure they are still suitable.
